Professional Summary

I am a highly skilled FullStack Developer with over 8 years of experience designing and implementing scalable software solutions across diverse industries. My technical expertise includes Node.js, TypeScript, Python, Go, microservices architecture, and cloud technologies. I am passionate about improving system performance, reliability, and test coverage, and have a proven track record in delivering innovative and optimized solutions.

Technical Skills

- **Backend Development**
  - Node.js & Express: 5 years
  - Python & Django: 1 year
  - PHP & Laravel: 3 years
- **Frontend & Mobile Development**
  - JavaScript: 6 years
  - TypeScript: 2 years
  - React Native: 3 months
  - Angular: 1 year
- **Databases**
  - PostgreSQL: 3 years
  - MongoDB: 5 years
  - MySQL: 1 year
- **Cloud & DevOps**
  - AWS: 5 years
  - Docker: 4 year
  - Git: 7 years
  - Linux Shell: 10 years

Professional Experience

BTi Lab, Remote (Colombia)
Backend Developer | Feb 2023 – Aug 2023

- Developed features and data analysis systems using Python, Node.js, MongoDB, and AWS.
- Contributed to an AI-powered product for optimizing social media publications.
- Expanded technical expertise transitioning from Node.js to Python.

DevSavant, Remote (Colombia)
Backend Developer | Feb 2022 – Jan 2023

- Developed a user communication tool, integrating multiple service providers across different languages to trigger personalized experiences and external API calls.
- Rebuilt and enhanced a delivery management system, improving scalability while ensuring minimal disruption to the existing client base.
- Worked with Go, JavaScript, Node.js, Python, PHP, and microservices architecture to deliver robust solutions.

S4N, Remote (Colombia)
Backend Developer | Aug 2019 – Dec 2021

- Developed a TypeScript tool to automatically load and scrape information from resumes, optimizing the hiring process for worldwide clients.
- Improved system stability in a high-availability environment by resolving critical bugs and ensuring 100% test coverage.
- Automated team processes by implementing a Slack bot for surveys, enhancing efficiency.

Digital Product School by UnternehmerTUM, Munich, Germany
Software Engineer | May 2019 – Jul 2019

- Built a train delay reporting system using Google Cloud and Firebase.
- Implemented gamification features to enhance user engagement.
- Configured Docker containers for project deployment.

Konecta Software Factory, Medellín, Colombia
Analyst Developer | Sep 2018 – Apr 2019

- Refactored legacy code and resolved issues in PHP, SQL, and JavaScript projects.
- Managed a database migration for a client.
- Created and supervised technical tests for new analysts.

Tecnología Digital 7, Pereira, Colombia
Backend Developer | Sep 2018 – Apr 2019

- Developed a web system for tracking developer performance.
- Designed interfaces for an Object-Oriented Blockchain system.
- Created a Bitcoin wallet using Node.js.

Universidad Tecnológica de Pereira, Pereira, Colombia
Software Developer Assistant | Mar 2015 – Dec 2016

- Maintained and updated university websites with PHP and Laravel.
- Designed a georeferencing system with PHP Laravel to plan accessible campus routes.
- Developed a search engine for student regulations and created a bibliographic reference database.

Education

Bachelor of Science in Systems and Computing Engineering
Universidad Tecnológica de Pereira, Colombia | August 2018

Graduated as a Systems and Computer Engineer with a solid foundation in the full software development lifecycle, including analysis, design, development, deployment, and maintenance. Trained to deliver innovative solutions supporting technological infrastructure, with a strong focus on information security and sustainability. Key competencies include:

- Leading multidisciplinary teams to create tailored tech solutions for organizations

- Designing intelligent models to optimize processes and improve efficiency
- Conducting technology research and staying committed to continuous learning
- Strong foundation in software architecture, database management, and IT consulting

Software Engineering Scholarship
Digital Product School (DPS) by UnternehmerTUM, Germany | May 2019 - July 2019

Awarded a competitive scholarship to join a three-month, full-time program focused on digital product development. Collaborated within a cross-functional team to create MVPs addressing real-world challenges in mobility and transportation. Key skills and methodologies acquired:

- Conducted technical feasibility studies, refactoring, and pair programming
- Practiced Agile methodologies, including Scrum framework, backlog management, and daily stand-ups
- Applied Design Thinking for problem-solving, user story mapping, and product iteration
- Engaged in problem interviews to validate solutions and align them with user needs

Volunteering & Extracurricular Activities

Domus Galilea Monastery, Jerusalem
Volunteer | Sep 2023 – Sep 2024

- Enhanced communication and intercultural skills by serving pilgrims from around the world.
- Developed technical abilities in computer maintenance, carpentry, and wait-staff duties while learning Italian to communicate more effectively.
- Cultivated adaptability, perseverance, and problem-solving through diverse volunteer tasks and experiences.

Exile (Videogame)
Open-Source Contributor | Sep 2021, Jun 2022

- Contributed to the development of Exile, an open-source wilderness survival game built on the Minetest engine.
- Added a new object and mechanic to enhance gameplay.
- Assisted with the Spanish translation, expanding the game's accessibility to a broader audience.
- Improved game documentation, ensuring clearer instructions and better overall usability.

Languages

- **Spanish** (Native - C2): Complete proficiency in both formal and informal contexts. Able to handle complex technical and business communications effortlessly.

- **English** (Professional Proficiency - C1): Highly skilled in both spoken and written English, including technical documentation, presentations, and business communication. Comfortable working in international teams, leading meetings, and collaborating across different domains.

- **Italian** (Conversational Proficiency - B1): Intermediate level with the ability to hold conversations, understand main points in familiar contexts, and read technical content. Actively improving vocabulary and fluency to reach advanced proficiency.

- **French** (Beginner - A1): Currently learning, with a focus on building foundational vocabulary and conversational skills.

Additional Information

Professional Interests

- Continuous Learning: I'm committed to constantly evolving, staying ahead by mastering new technologies and methodologies.
- AI and Machine Learning: These fields fuel my passion for building smarter, data-driven systems that can adapt and grow.
- Backend Development: Crafting efficient, scalable solutions is at the heart of what I do, always with performance and reliability in mind.
- Cloud Computing: I leverage cloud technologies to design flexible, scalable systems that meet the demands of modern applications.
- Data Engineering: I'm fascinated by how data can be harnessed to improve decision-making and optimize system performance.
- Software Architecture: Designing robust, maintainable architectures is key to delivering long-lasting, high-quality software solutions.

Personal Interests

- Astronomy: The vastness of the universe inspires both my creativity and my problem-solving approach.
- History: Understanding the past enriches my perspective, influencing both my personal growth and my work.
- Science Fiction: A passion for exploring what-ifs and imagining future worlds drives my creativity and innovation.
- Role Playing Games: I enjoy immersing myself in complex worlds, using strategy, imagination, and teamwork to solve challenges.
- Traveling: Exploring new cultures and environments deepens my understanding of the world and enhances my adaptability.
- Pluriculturalism: Embracing diverse cultures helps me grow as an individual and as a professional in an interconnected world.
- Languages: Learning new languages allows me to connect with people from all walks of life and broadens my communication skills.
- Minimalism: Focusing on the essentials helps me maintain clarity and prioritize what truly matters in my life and work.
